An advanced enrollment questionnaire was sent to 2,337 US institutions in 1966 as part of the Higher Education General Information Survey (HEGIS), the eighth in USOE's survey series on students enrolled for advanced degrees. Students were classified into 3 levels of study: first year (completed less than 1 full year of required study for an advanced or first-professional degree), terminal year (expected to complete all doctoral or professional degree requirements by June 30, 1967), and intermediate year (between the two levels above). The report has 6 tables showing actual counts for 706 reporting institutions, which accounted for about 95% of fall 1966 advanced degree enrollments. Table 1 applies to students pursuing master's and doctor's degrees and provides national summaries of enrollments. Table 2 gives similar data on enrollments leading to first-professional degrees. Table 3 classifies enrollments by subject matter specialization. In Table 4 enrollments for master's and doctor's degrees are shown by level, sex of student, and attendance status at each institution listed, by state, and Table 5 provides similar data for first-professional enrollment. An institutional listing of enrollments in each field of study is provided in Table 6. It is estimated that student enrollments rose 9% from fall 1965 (535,000) to fall 1966 (583,000), 60% of which were reported by public institutions. Two appendices provide additional information. HIGHLIGHTS

1. Enrollment for master's and doctor's degrees rose an estimated 9 percent from fall 1965 to fall 1966. The total was about 535,000 in fall 1965 as compared with an estimated total of 583,000 in fall 1966.

2. Only about 4 percent of the fall 1966 candidates for master's and doctor's degrees were expected to received the doctorate by June 1967. As of fall 1966, two-thirds (67 percent) had completed less than one full year of study; the remaining 29 percent were in intermediate years of study.

3. Nearly half of the master's and doctor's candidates (46 percent) were reported to be enrolled full time. The figure varied considerably from one level of study to the next. Among the first-year group, about 40 percent were enrolled full time as compared with about 58 percent and 65 percent in the intermediate and terminal groups, respectively.

4. Public institutions accounted for about 60 percent of students enrolled for master's or higher degrees.

5. Less than one-third (31 percent) of the candidates were women.

6. More of the first-year candidates for master's and higher degrees were enrolled in elementary education than in any other field of study. At the intermediate level, English was the most popular major. Chemistry led in the terminal year group.

INTRODUCTION

Enrollment for master's and doctor's degrees rose an estimated 9 percent from fall 1965 to fall 1966. The total was 535,000 in fall 1965, as compared with an estimated total of 583,000 in fall 1966. (The basis for the 1966 estimate is considered in more detail in the section, Institutions Included.) In addition, in fall 1966 a total of 103,000 students were enrolled in selected programs leading to first-professional degrees. Information on these programs was not collected in previous surveys in this series.

The present survey is the eighth in the U.S. Office of Education's series on students enrolled for advanced degrees. The initial survey in this series, conducted in fall 1959, was limited to the fields of science, mathematics, and the health professions. In 1960, the survey was expanded to cover all of the principal areas in which master's and higher degrees were awarded. The 1966 survey, which was part of the first Higher Education General Information Survey (HEGIS), differed from previous surveys in several respects. One area of change, as noted above, was the addition of a section on enrollments in programs leading to first-professional degrees in eight selected fields. Another change involved the classification of enrollments by sex of student. A third change concerned the field of engineering; in previous surveys, only one overall enrollment figure was collected for engineering; in 1966, engineering enrollments were classified into 18 separate categories. Finally, the list of fields of study was expanded to include three not previously specified: City Planning, Folklore, and Records Management.

Overall findings of the seventh annual survey of enrollment for advanced degrees were published in a brief summary report, Students Enrolled for Master's and Higher Degrees, Fall 1965, OE-54009-65.

The reader concerned with enrollment trends by field of study should also refer to the Office of Education's series on degrees granted. The most recent report in that series is Earned Degrees Conferred, 1966-67, OE-54013-67. Together, the two survey series provide a fairly comprehensive picture of the flow of students through advanced studies into the world of employment.

A copy of the survey questionnaire and of the instructions to respondents is provided in appendix B of this report.

INSTITUTIONS INCLUDED

As part of the HEGIS package, the advanced enrollment questionnaire was sent to all 2,337 institutions in the 1966-67 higher education survey universe. (See Opening Fall Enrollment in Higher Education, 1966, OE-54003-66, for a description of the survey universe.) It was, of course, recognized that many institutions in the universe did not have programs leading to advanced degrees. At the same time, it was felt that the Office of Education might obtain more complete coverage of such programs--especially of those that were newly-organized--if the questionnaire were sent to all institutions.

A total of 761 institutions provided data for this survey. Of these, 168 had enrollments for both first-professional degrees and master's or doctor's degrees; 538 had enrollments for master's and doctor's degrees only; 55 had enrollments for first-professional degrees only. Thus, summary figures for master's and doctor's degrees are based on 706 institutions; those for first-professional candidates are based on 223 institutions.

Among the nonrespondents in the fall 1966 survey, it was possible to identify 35 institutions which had reported enrollment for master's and doctor's degrees in 1965. These 35 institutions, which are listed in appendix A, accounted for about 5 percent of the total enrollment for master's and doctor's degrees in fall 1965. In the absence of information to the contrary, it seems reasonable to assume that these 35 institutions might also have accounted for about 5 percent of fall 1966 enrollments for master's and doctor's degrees; in other words, the 706 institutions that did provide data on master's and doctor's candidates probably accounted for about 95 percent of the 1966 enrollments. On this basis, it is estimated that fall 1966 enrollment for master's and doctor's degrees was about 583,000 rather than the 555,000 actually reported. Because information was not previously collected on first-professional enrollments, comparable estimates were not made in this area.

The tables of this report are based on only those institutions actually providing data for the survey. In interpreting the tables, and particularly in making year-to-year comparisons, it should be kept in mind that certain institutions were not included in the fall 1966 survey.

STUDENTS INCLUDED

Institutions were requested to include in part A of the report form all students enrolled for a master's degree, for a 6-year degree (such as Education Specialist or Civil Engineer), or for a doctorate. In part B, they were asked to include students enrolled for first-professional degrees in eight selected fields. Several categories of students were specifically excluded: Students not enrolled during the fall term, even if they were known to be studying toward an advanced degree, students in programs not terminating in an advanced degree, and post-doctoral students. Section B of the instructions to survey respondents (appendix B) provides a more detailed account of students to be included or excluded.

LEVELS OF STUDY

Colleges were asked to classify students into three levels of study: First year, intermediate years, and terminal year. First-year students were defined as those who had completed less than one full year of required study for an advanced degree (or toward the first-professional degree). Terminal students were those expected to complete all doctoral requirements (or all requirements for the professional degree) by June 30, 1967. Intermediate students, then, were those falling between the two extremes. The levels of study are defined in sections F and I of the survey instructions (appendix B).

ORGANIZATION OF THE TABLES

As noted previously, it is estimated that the 706 institutions providing information on master's and doctor's candidates included about 95 percent of the nationwide total of such enrollments. In view of this very high proportion of returns, it was decided that the detailed tables should show actual counts for the reporting institutions rather than estimates involving minor statistical adjustments for the missing institutions.

Tables 1 and 2 provide national summaries of advanced enrollments by level (first year of study, intermediate years, and terminal year), attendance status (full-time or part-time), sex of student, level of institution, and institutional control. Table 1 applies to students in programs leading to master's and doctor's degrees; table 2 applies to students in programs leading to first-professional degrees.

Table 3 classifies enrollments by subject-matter specialization. For each field listed in the questionnaire, counts are given by level of enrollment, attendance status, and sex of student.

Institutional data are presented in tables 4, 5, and 6. Table 4 lists institutions in order within each State; for each institution, enrollments for master's and doctor's degrees are shown by level, attendance status, and sex of student. Table 5 provides similar information on total first-professional enrollment at each institution. Table 6, which makes up the bulk of this report, provides an institutional listing of enrollments in each field of study.

Appendix A lists the colleges which failed to provide data for the 1966 survey but which had provided data in 1965. The number of full-time and part-time students at each of the three levels of study, as reported in the 1965 survey, is shown for each of the 35 institutions; as pointed out earlier, the 1965 survey did not provide for separate counts of men and women or for enrollments in professional programs.

Appendix B consists of a copy of the report form and of the instructions to respondents.

OFFICE OF EDUCATION
WASHINGTON, D. C., 20202

HIGHER EDUCATION GENERAL INFORMATION SURVEY

SCHEDULE V. -- STUDENTS ENROLLED FOR ADVANCED DEGREES, FALL 1966

(Please complete and return on or before January 10, 1967)

Name and title of person reporting:

Tel: area code, number, and ext.

Date

This schedule is designed to collect information needed by the National Science Foundation, the National Institutes of Health, and the Office of Education for planning and administering graduate fellowship, training, research, and facilities programs. The information is also of interest to other governmental agencies, educators, researchers, and others interested in education, as well as to private corporations and foundations which utilize these data for recruitment purposes and to guide their own programs of gifts and grants.

Please read the definitions and instructions before entering the data for your institution. If you need additional clarification on any of the items, please call Mrs. Hazel Poole, **Area Code (202) 962-2937 in Washington, D. C.**

NOTE: THE DATA PROVIDED IN THIS SURVEY MUST BE TYPED ON THESE FORMS, SINCE THEY WILL BE PROCESSED BY CHARACTER-READING OPTICAL SCANNING EQUIPMENT. PLEASE BE SURE THAT THE TYPEWRITER IS IN GOOD CONDITION, THAT THE KEYS ARE CLEAN, AND THAT THE RIBBON IS NEW. NYLON OR ONE-TIME PLASTIC BLACK RIBBONS PRODUCE THE BEST RESULTS. THE TYPING SHOULD BE CONFINED TO THE SPACE WITHIN THE PURPLE OUTLINES OR BOXES. PLEASE USE ONLY NUMBERS FOR ALL DATES, IN MONTH, DAY, AND YEAR SEQUENCE. STRIKEOVERS AND ERASURES SHOULD BE AVOIDED.

DEFINITIONS AND INSTRUCTIONS

STUDENTS ENROLLED FOR ADVANCED DEGREES, FALL 1966

General

A. PURPOSE: The purpose of this schedule is to ascertain the number of students enrolled this term for advanced degrees, the the students' fields of specialization, their progress toward their degrees, and the numbers who are expected to complete the requirements for the doctoral or selected professional degrees by June 30, 1967.

The information requested is needed by the National Institutes of Health, the National Science Foundation, and the Office of Education to aid in planning their fellowship programs. The information is used also by a number of organizations and institutions interested in the training of graduate students.

B. SCOPE OF THE SURVEY: This is not a survey of all students taking graduate study, but of all enrolled for a degree beyond the baccalaureate.

1. Students to be included in the report:
    a. Include in Part A all students enrolled for a master's degree; for a 6-year degree such as Education Specialist (Ed. S.), Civil Engineer (C.E.), etc.; and for the doctorate (Ph. D., Ed. D., etc.)
    b. Include in Part B all students enrolled for first professional degrees in Dentistry (D.D.S. or D.M.D. only), Law (LL.B. or J.D. only), Medicine (M.D. only), Theology (B.D. only), Veterinary Medicine (D.V.M. only), Chiropody or Podiatry (D.S.C. or D.P.), Optometry (O.D.), and Osteopathy (D.O.). Students in these fields enrolled for degrees beyond these specifically named here should be reported in Part A.
    c. Include in Parts A and B students enrolled for an advanced degree on the main campus, on a branch campus, or in an extension center.
2. Students to be excluded from this report:
    a. Students who, although known to be working on degree requirements, are not formally enrolled this term.
    b. Students enrolled in graduate-level curriculums which lead to increased professional competence, but which do not terminate in an advanced degree. Students in certificate programs, for school principals for example, should be excluded.
    c. "Special" and "unclassified" students taking courses at the levels requested, but not enrolled for degrees.
    d. Post-doctoral students.
    e. Students enrolled at a branch or extension center in a foreign country.

C. TIME PERIOD: Report only those students enrolled as of the fall term (November) of the current academic year.

Part A--Students enrolled for Master's and Higher Degrees

D. GROUPING OF SUBJECT-FIELDS: Please examine Part A of this schedule to observe how the various fields of study have been grouped. Each subject group is divided to indicate enrollment by men (M) and women (W). All of the subject-fields have been classified under the following 26 capitalized headings:

1000	AGRICULTURE
1400	ARCHITECTURE
1700	BIOLOGICAL SCIENCE
2000	BUSINESS AND COMMERCE
1500	CITY PLANNING
2100	COMPUTER SCIENCE AND SYSTEMS ANALYSIS

(continued on following page)

2300	EDUCATION
2600	ENGINEERING
2900	ENGLISH AND JOURNALISM
3200	FINE AND APPLIED ARTS
3300	FOLKLORE
3500	FOREIGN LANGUAGES AND LITERATURE
3800	FORESTRY
4100	GEOGRAPHY
4400	HEALTH PROFESSIONS
4700	HOME ECONOMICS
5000	LAW
5300	LIBRARY SCIENCE
5600	MATHEMATICAL SUBJECTS
6500	PHILOSOPHY
6800	PHYSICAL SCIENCES
7100	PSYCHOLOGY
7300	RECORDS MANAGEMENT
7400	RELIGION
7700	SOCIAL SCIENCES
8300	BROAD GENERAL CURRICULUMS AND MISCELLANEOUS FIELDS

If your institution does not enroll students for advanced degrees in one of the 26 subject areas listed above, you may skip all of the items under that heading. Thus, most registrars will properly skip the entire section headed "AGRICULTURE". Similarly, many will properly skip the sections on "HEALTH PROFESSIONS" and on "RELIGION". Many specialized professional schools will skip the section on "EDUCATION". Technological schools will generally skip the section on "FINE AND APPLIED ARTS". Men's colleges will skip the section on "HOME ECONOMICS". Appropriate skipping can speed the completion of your report without injury to quality or accuracy.

E. CLASSIFICATION OF ENROLLMENT BY FIELD OF STUDY: Students should be reported in the fields in which they are specializing, regardless of the department, division, or college in which they are enrolled. For example, students specializing in Agricultural Engineering should be reported in item 2607 under the broad area of Engineering even though they may be receiving their training in the school of Agriculture.

1. Please classify enrollment into fields of study as specifically as the list on the schedule permits. Example: Enrollment in an Accounting curriculum should be reported as "Accounting" (Item 2002), NOT in "Business and Commerce, General" (Item 2001).

2. Enrollment in fields of study which are not listed should be consolidated with the listed fields if such consolidation is descriptive of the specialization. Thus,

   Sculpture should be reported in "Fine and Applied Arts, other major fields" (Item 3213);

   Astrophysics should be reported in "Astronomy" (Item 6804);

   Geochemistry should be reported in "Earth Science, all other" (Item 6828);

   Criminology should be reported in "Sociology" (Item 7725);

   Police Administration should be reported in "Applied Social Sciences, all other" (Item 7746);

   Industrial Design should be reported in "Fine and Applied Arts, other specific major fields" (Item 3213) or in "Architecture" (Item 1400)-- depending on the nature of the curriculum; and so on.

3. Fields of Study Offered By Your Institution For the First Time This Term: If enrollments are reported in fall 1966 for the first time, in a field of study new to your institution, please place an "X" beside the item number. This may save correspondence later regarding the entry.

4. Inter-area fields of study: Item 8313 is for reporting fields of specialization which represent two or more broad SUBJECT AREAS. For example, MASS COMMUNICATIONS, encompassing segments of PSYCHOLOGY, EDUCATION, BUSINESS, JOURNALISM, SOCIAL SCIENCES, FINE ARTS, etc., should be reported here. Specify the name of the inter-area field of study, when reporting in Item 8313, and list the code numbers of the major SUBJECT AREAS in which it could be classified.

5. If the field of study does not fit into any of the listed fields, report in Item 8314, Field of Study Not Classifiable in Items 1000 through 8313 above.

6. If there is no information about the field of study, report the enrollment in Item 8399, Field of Study Not Identified.

7. A cross-reference listing of related fields of study appears immediately following each subject-area on the form. Your attention to these lists will be appreciated.

8. Note that the listing of fields of study within each broad subject area has a similar structure. The first field of study in the list is the general curriculum in the subject area (with no further specialization); the next-to-last field of study is for reporting fields of study within the subject area which are not listed; and the last category is for reporting enrollment where the field of study within the subject area is not known--where there is no information on the specilization within the subject area.

F. CLASSIFICATION OF ENROLLMENT BY LEVEL OF STUDY: To be consistent with the categories of fellowship support used by the National Institutes of Health and the National Science Foundation, please classify enrollment into the following categories:

1. Students who have completed less than one full year of required study for an advanced degree.--Report in columns 3-6 students who, prior to this term, had completed less than two semesters or three quarters of full-time graduate study or the equivalent in part-time study. Note that these students are identified by the amount of study completed prior to this term, rather than the number of semesters or quarters in which they have been enrolled. Work required because of lack of undergraduate background is not to be included in computing amount of study completed.

2. Students who have completed one or more years of required study but who are not expected to complete all doctoral requirements by June 30, 1967.--Report in columns 7-10 students who, prior to this term, had completed two semesters or three quarters or more of full-time study or the equivalent in part-time study for an advanced degree but who are not expected to complete all doctoral requirements by June 30, 1967.

3. Students who are expected to complete all doctoral requirements by June 30, 1967.--Report in columns 11-14 the ESTIMATED number or students who are expected to complete all DOCTORAL (Ph. D., Ed. D., etc.) requirements by June 30, 1967.

G. CLASSIFICATION OF ENROLLMENT BY ATTENDANCE STATUS:

A full-time student is one whose academic load in terms of course work or other activity (such as a thesis) is at least 75% of that normally expected of such students. Time spent by teaching fellows should be included only if such teaching is performed as a requirement for a degree. Employment which is not a part of the prescribed activity for an advanced degree should not be counted as time spent on graduate work. A part-time student is one who is carrying an academic schedule of less than three-fourths the normal load.

H. PLEASE EXPLAIN exceptionally large increases or decreases in specific fields of study, the absence of enrollment in previously reported curriculums, etc.

PART B--STUDENTS ENROLLED FOR PROFESSIONAL DEGREES IN SELECTED FIELDS

I. CLASSIFICATION OF ENROLLMENT BY LEVEL OF STUDY:

1. Report in columns 3-6 those students who have completed the previous college work (professional training) required for admission to the professional school but who, prior to this term, had completed less than two semesters or three quarters of full-time study or the equivalent in part-time study in the professional school. Note that these students are identified by the amount of study completed prior to this term, rather than the number of semesters or quarters in which they have been enrolled. Work required because of lack of preprofessional background is not to be included in computing amount of study completed.

2. Report students who have completed one or more years of required study but who are not expected to complete all requirements for the professional degree by June 30, 1967 in columns 7 - 10 of Part B. Report in these columns students who, prior to this term, had completed two semesters or three quarters or more of full-time study or the equivalent in part-time study for the professional degree but who are not expected to complete all requirements by June 30, 1967.

3. Report students who are expected to complete all requirements for the professional degree by June 30, 1967 in columns 11-14 of Part B.

J. CLASSIFICATION OF ENROLLMENT BY ATTENDANCE STATUS:

See paragraph G above.
